### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Robert Van Someren on 12/27/04.

The application has been amended as follows: **Cancel claim 20 and amend the followings claims as shown.**

**19. A method for splicing tubing having an internal power cable for use in providing power to an electric submersible pumping system, comprising:**

**coupling an intermediate tubing section between a pair of tubing sections of equal diameter to the intermediate tubing section via a pair of mechanical connectors; and splicing an internal power cable within the intermediate tubing section[.] wherein;**

**splicing comprises connecting an upper and a lower segment of the power cable to an electrical connector disposed between the pair of mechanical connectors.**

**Also, in claims 21, 25 and, 27 delete “claim 20” in line 1 and replace with –claim 19--.**

2. The following is an examiner’s statement of reasons for allowance: The reasons for allowance of claims 3, 6, 7 and, 16 were indicated in the previous office action. Regarding claim 8 the power cable delivers three-phase power to a submersible motor and pumping system. Regarding claim 19, a method of splicing comprising connecting segments of the power cable to an electrical connector within sections of intermediate tubing of equal diameter that are further connected together by mechanical connectors.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Carisella teaches electrical connectors coupling cabling and mechanical connectors for tubing but no method of splicing and the tubing is not of an identical diameter.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael C. Zarroli whose telephone number is 571-272-2101. The examiner can normally be reached on 7:30 to 3:30 M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, T.C. Patel can be reached on (571) 272-2800 ext 39. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
